Nil

There are three different classes of government contracts and the type of information required differs according to the class:

Class 1

Contracts with a value of \$150,000 or more (inc.GST) require certain details to be recorded as a baseline, or minimum.

Class 2

Class 1 and contracts where there was no competitive tender or quoting process and terms were negotiated directly with contractor, e.g., a standard form contract was not used, or it was used but significant changes were negotiated to it; or contracts where there was a competitive tendering or quoting process but the signed contract (whether or not a standard one) is substantially different from the draft issued to obtain quotes; or contracts contain obligations for maintenance or operations for 10 years or more; or contracts involve a privately financed project; or contracts involve transfer of a significant asset of the agency to another party in exchange for the transfer of an asset to the agency.

Class 3

Class 2 contracts with a value of \$5 million or more (inc.GST), must include a copy of the contract.
