

Record of Open Access Information

**Not currently available on Council's website or not released due to an
overriding public interest against disclosure**

Introduction

Under section 6 of the *Government Information (Public Access) Act 2009 (NSW) (GIPA Act)* Council must make its *open access information* publicly available unless there is an overriding public interest against disclosure of the information. Further, Council must keep a record of the open access information (if any) that it does not make publicly available based on an overriding public interest against disclosure.

Council does not have any open access information that it has decided against making publicly available due to an overriding public interest against disclosure. Some open access information is not publicly available on the website and this is included in Table 1, including how it may be accessed free of charge.

The following documents are defined as *open access information* under Section 18 of the *GIPA Act* and will be released without the need for a Formal Access Application under this Act:

- Council's Agency Information Guide (available on Council's website);
- Information about Council contained in any document tabled in Parliament by or on behalf of Council, other than any document tabled by order of either House of Parliament;
- Council's policy documents (available on Council's website);
- Council's Disclosure Log of Formal Access Applications (available on Council's website);
- Council's Register of Government Contracts (available on Council's website);
- Council's record of the open access information (if any) that it does not make publicly available based on an overriding public interest against disclosure (available on Council's website);
- Councillors' and Designated Persons' Disclosure of Interests Returns (available on Council's website); and
- Such other government information as may be prescribed by the GIPA regulations as open access information.

Table 1 – Open Access Information not currently available on the website.
