

### Community Access Committee

The Community Access Committee is a Section 355 Committee of Council, and includes Council Representatives and voluntary members who represent community interests in access throughout the Local Government Area. The Committee meets six (6) times per year and reports to Council on its activities, projects and requests for attention to matters affecting access to public areas and facilities.

The Committee raises awareness of access issues with local businesses, and where appropriate provides advice on how access might be improved. Council staff provide information to the Committee on initiatives and projects being undertaken by Council, for example in development and implementation of the Pedestrian Access Mobility Plan.

For contact details for the Committee Chairperson, or information from the Manager Community Services, call **6730 2300**
